Power Supply

Weidmüller 

Reliable power supply for highest demands

PROtop 'the innovative one'

If reliable availability and energy efficiency are required even under adverse conditions or in hard-to-reach locations, then our PROtop family is the right choice. The predestined solution. The powerful DCL technology gives the switched mode power supply units an outstanding Dynamic range - ideal for reliable pulse triggering of miniature and standard circuit breakers or as additional energy for powerful motor starts.

- Safe tripping of miniature circuit breakers due to peak current reserve of 600 % for 20 ms
- Efficiencies of up to 95.4 % lead to low heat losses and extremely space saving housings
- New data interface makes the PROtop power supplies fit for digitization
- Start-up temperatures as low as -40 °C (for EX/C1D2 version)
- Redundancy without diode module

Maximum load capacity and versatility in application

PROmax, 'the powerhouse'

The powerful switched mode power supplies of the PROmax series are designed for demanding mechanical engineering applications. They show their strengths in plant engineering, in the food and beverage industry, in automotive engineering and even in plants of the process industry. Permanent overloads up to 20% of nominal current at 45 °C or short-term peak loads until 300% of nominal current are easily absorbed by PROmax. With start-up temperatures as low as -25 °C, the power supplies are particularly robust. Thanks to their small overall width, they also fit into limited space conditions. A wide range of approvals make PROmax suitable for worldwide use.

- High load capacity with constant output powers up to 120 % at temperatures up to + 45 °C and high output peaks up to 300 %
- Universally applicable with variants from 3 A to 40 A output current and output voltages from 5 V DC to 48 V DC
- V DC
- Particularly robust with start-up temperatures of -25 °C

Economical power supply solutions

PROeco "the economical solution"

Switched mode power supplies with above average performance values can create real competitive advantages, especially in series machine construction. We have therefore designed our PROeco series to be particularly efficient. With an installation depth of max. 120 mm, you can easily insert the devices even into flat control boxes. And you also achieve space savings of up to 50 % in width. At the same time, all basic functions are included in the compact format.

- Sustainably more efficient due to efficiency of up to 93 % and low idling losses
- Reliable in a wide temperature range from -25 °C to +70 °C and with MTBF value of > 500,000 h
- Fast status diagnosis using three-color LED display and integrated status relay

A permanent power supply for buildings and machines

INSTA-POWER – compact, highly efficient and reliable

The single-phase INSTA-POWER switched mode power supplies are characterized by a large power spectrum, a compact design and a good price-performance ratio. They are suitable for temperature ranges from -25 °C to +70 °C, have international approvals and a wide range voltage input. This makes them suitable for a wide range of applications. This also includes signal and telecommunication systems as well as automation systems with low power requirements up to 96 watts.

- Extremely compact and particularly energy-efficient
- Available in nine variants with 5, 12, 24 and 48 V DC output voltage
- Universally applicable thanks to international approvals (cCSAus (UL508), Cl. 1, Div. 2, and NEC Class 2 until 90W)
- Flexible on mounting rails or wall mountable at the Switch cabinet
- Fast installation with PUSH IN connection technology

Type	Input AC	Input DC	Output	Dimensions	Order number	
			rated voltage- DC	Adjustable Output

Reliably protect sensitive system components with our extension modules

Make your supply concept permanent. Connect your switched mode power supplies with optimally matched supplementary modules:

- modular configurable DC UPS system with lead-gel batteries, gives autonomy to our equipment
- Buffer module: Capacitor-based, maintenance-free which supports loads of 20 A / 260 ms or 4A/ 10s.

- Capacity module: Offers energy reserves, for example to trigger a miniature circuit breaker quickly and specifically
- Redundancy diode modules: for safe parallel operation and/or active load sharing

Weidmüller – Your partner in Industrial Connectivity

As experienced experts, we support our customers and partners around the world with products, solutions and services in the industrial environment of power, signals and data. We are at home in their industries and markets and understand the technological challenges of tomorrow. We are therefore continuously developing innovative, sustainable and useful solutions for their individual needs. Together, we set standards in industrial connectivity.

We cannot guarantee that there are no mistakes in the publications or software provided by us to the customer for the purpose of processing orders. We try our best to quickly correct any errors in our printed media.

All orders are based on our general terms of delivery, which can be reviewed on the websites of our group companies where you place your order. Upon request, we can also send the general terms of delivery to you.
